Crestron Zūm[™]

Wireless lighting control made easy

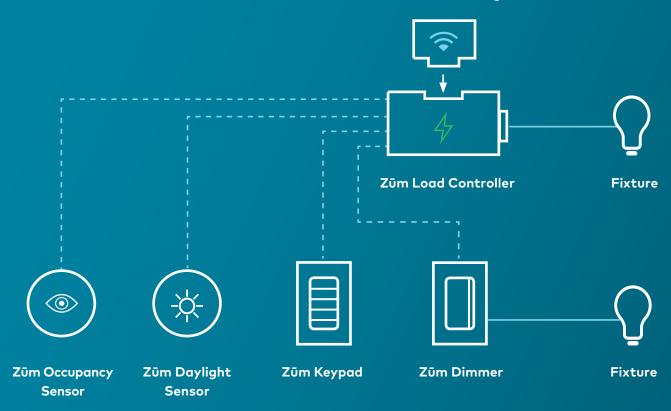

Experience lighting control at the speed of Zūm

Easy to design Easy to set up Easy to manage Affordable Zūm is a simple wireless lighting control system. Each device is thoughtfully engineered to work together seamlessly. Setup is as easy as "pair and play" with a tap of the dimmer or keypad, or from the iPhone® or Android[™] app. Even better, Zūm is affordable and highly scalable. Start with one space, or several. Even add centralized network management.

Zūm Network Bridge

Easy to design

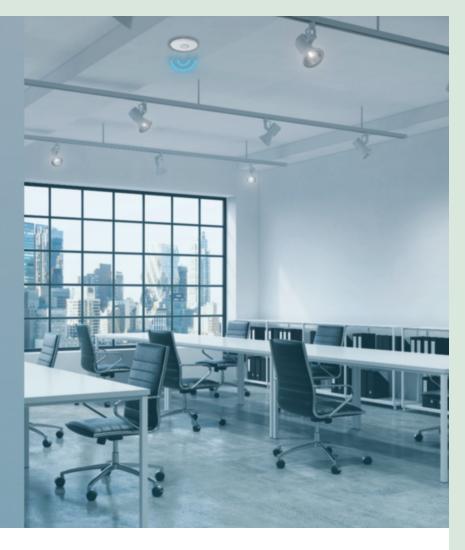

With just a few wireless "building block" devices, Crestron Zūm makes lighting control exceptionally simple to design. Use the same devices for standalone spaces and building-wide systems. No interface boxes, antennae, or programming are required.

Zūm Setup App - Download straight from the App Store

Easy to set up

All Zūm devices intelligently "pair and play" with the tap of a keypad, dimmer, or mobile device. The Zūm app makes it easy to name and combine rooms, set scenes, optimize daylighting, set up a time clock for scheduled events, and execute temporary overrides.

Easy to manage

Building-wide lighting control is just as easy as in-room lighting control. Simply snap the Zūm Network Bridge into the Zūm Load Controller that's already installed in the room. Get centralized management and control, and Zūm Cloud Services for every Zūm space.

Zūm Load Controller and Network Bridge

Zūm Platform

Standalone Zūm System

Zūm Load Controller

(Options: 0-10V, Relay, Plug, Universal Phase) Enables all system devices to communicate with each other – up to 1920W

Zūm Network Bridge

Snaps onto the Zūm Load Controller to set up and manage spaces remotely – covers 2.25 million sq. ft. without visible antennas

Zūm Daylight Sensor

Automatically adjusts lighting based on natural light levels

Zūm Occupancy Sensor

Provides in-room automation and room usage data to Zūm Cloud service

Zūm Keypad

Standard backbox installation, or stick battery powered Zūm keypad anywhere – even on glass or brick

Zūm Dimmer

Standard backbox installation, or stick battery powered Zūm keypad anywhere – even on glass or brick

Building-wide Zūm System

Zūm Floor Hub

Pairs with Zūm Network Bridge in each room. Connects to the LAN for communication with Zūm Cloud service with traditional centralized Crestron lighting control, AV, shades, and HVAC

Zūm Cloud

Easily see where lights are on in vacant spaces and turn them off. Collect valuable room usage data and reporting to reduce energy consumption, justify budgets, and drive future planning
